1. Please provide your views on the Procedure Change Proposal, including any objections or suggested revisions:

LGP supports the Procedure Change Proposal as this procedure is central to the development of the market and the proposal corrects a manifest error and otherwise harmonises the procedure with a number of rule changes that have indirect impact. In particular, we support the clarification that a load participating in a Demand Side Program can be used only once in respect of a claim for the return of the security in respect of the program.

2. Please provide an assessment whether the Procedure Change Proposal is consistent with the Market Objectives and the Wholesale Electricity Market Amending Rules.

LGP considers that the procedure change directly supports Market Objectives a (efficiency and reliability) and c (avoidance of discrimination), and is in harmony with the other objectives.

3. Please indicate if the Procedure Change Proposal will have any implications for your organisation (for example changes to your IT or business systems) and any costs involved in implementing these changes.

The proposal does not have any implications for LGP

4. Please indicate the time required for your organisation to implement the changes, should they be accepted as proposed.
