Prepared in accordance with Market Rule 2.10.10

INTRODUCTION

This document is the Procedure Change Report for the System Management proposed amendments to the Power System Operating Procedure: Operational Data Points for Generating Plant.

- This proposal was first published on the IMO website on 13 May 2009.
- A request for submissions to the proposal was published on 13 May 2009 with a deadline of 9 June 2009.
- This Procedure Change Report is submitted to the IMO for publication on 16 June 2009.
- This proposed amended procedure is to commence at 8 am on 1 August 2009.
- Commencement is pending approval by the IMO. Market Rule 2.10.14 requires the IMO to make its decision within 10 Business days of this Report being published.

THE WORDING OF THE AMENDMENT TO THE POWER SYSTEM OPERATING PROCEDURE

The amended procedure is attached to this Report.

THE REASON FOR THE AMENDMENT TO THE POWER SYSTEM OPERATING PROCEDURE

Section 3.3.4.1 and 3.3.4.2 of the Technical Rules deals with the requirements for Market Generators to provide operational data for the purpose of monitoring and control of Generating Units connected in the South West interconnected system.

In order to provide a consistent approach to the provision of operational data, this new PSOP provides details of System Management's minimum requirements for the operational data points to be provided by Market Generators for their generating units. This PSOP has been subject to consultation within the System Management PSOP Working Group.

SUBMISSION

System Management received one submission from Landfill Gas and Power regarding this procedure. The submission establishes Landfill Gas and Power's support for this procedure and perception that this procedure is consistent with the Market Rules and by extension the Market Objectives.

THE MARKET ADVISORY COMMITTEE

The Market Advisory Committee (MAC) did not meet regarding this procedure change proposal.

However, the SM Procedure Change Working Group did discuss the procedure change and made recommendations on 22 May 2009. All recommendations made by the Working Group were adopted.

IMPLEMENTATION

System Management recommends this amended procedure commence at 8 am 1 August 2009.

The above date, in System Management's opinion, allows sufficient time after the date of publication of the IMO's approval of the Procedure Change Proposal under clause 2.10.14, for Rule Participants to implement changes required by this Proposal.

Commencement is pending approval by the IMO. Market Rule 2.10.14 requires the IMO to make its decision within 10 Business days of this Report being published. This decision will include the final commencement date.
