PROCEDURE CHANGE EXTENSION NOTICE

Power System Operation Procedure: Monitoring and Reporting Protocol (PPCL_0024)

This notice of extension is given under clause 2.10.18 of the Market Rules.

Submitter: System Management

Date Submitted: 14 March 2013

Date of extension: 6 June 2013

Reasons for the Extension

In accordance with clause 2.10.17 of the Market Rules, the IMO has extended by 10 Business Days the timeframe for publishing the IMO's decision on the Procedure Change Proposal titled Revised PSOP: Monitoring and Reporting Protocol (PPCL0024).

The publication date for the IMO's decision is extended until **Thursday, 20 June 2013**.

The IMO has identified issues that it considers to be of sufficient difficulty to require it to extend the timeframe for its decision on the Procedure Change Proposal. In particular, the IMO has concerns about the proposed additional amendments to the consultation process for review of the Tolerance Range and Facility Tolerance Ranges. The IMO considers that further consultation on these additional amendments may be required.

For further details relating to the Procedure Change Proposal please refer to the Market Web Site <http://www.imowa.com.au/PPCL0024>.

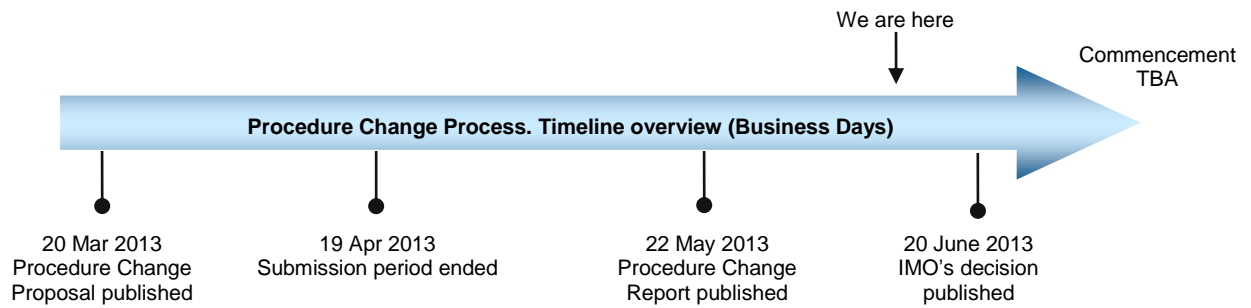

Proposed Work Programme

- The IMO consults further with System Management on its proposed additional changes to the PSOP.
- The IMO presents its decision on the Procedure Change Proposal.

Extended Timeline

The projected timelines for processing this proposal, including the extension are:
