1. Introduction

This document outlines the contents of the Daily Energy Summary files, which are part of the suite of National Electricity Market (NEM) data files published to Participants from the Electricity Market Management System (EMMS).

The files provide a source of historical daily energy (consumption and generation) by region for a period of at least one calendar year.

2. Daily Energy Summary File Contents

Daily Energy Summary data is published in two files:

Public file	Data aggregated to a region level.
Confidential file	Data aggregated to a region/Participant level (confidential to the relevant Participant).

The Daily Energy Summary data is derived from the BILLING_DAILY_ENERGYSUMMARY table in the EMMS Data Model.

The Daily Energy Summary files are csv files containing the information outlined in Table 1 below.

3. Data version

The data published in the Daily Energy Summary files is the most recent data available at the time that the files were created. That is, for each settlementdate in the file, the data published is from the most recent billing run that was posted **BEFORE** the day on which the files were created. For example, Daily Energy Summary files published on 1-Jul-2012 will be based on data from the most recent billing runs posted on or before 30-Jun-2012.

Date range covered

The Daily Energy Summary files contains data for a date range:

- ending with the most recent week for which Preliminary statements have been posted, and
- starting at the beginning of the calendar year prior to that week

For example, Daily Energy Summary files published on 1-Jul-2012 contain data up to and including 23-Jun-2012 (the last day in billing week 2012Wk25, for which Preliminary statements were published on 29-Jun-2012). The date range covered by the data will start on 1-Jan-2011 (the first day in the calendar year prior to 2012).
