Connections Simulation Tool Fee Structure

The service is run on a cost recovery basis according to the following Price Schedule. These fees will be reviewed on a regular basis.

Application Fee	$31,500		
Recreate Fee	$2,500		
Engineering Effort	$315/hour		
Environment Charge	**32 core VM** $175/day	**64 core VM** $270/day	**104 core VM** $470/day

* All prices above exclude GST

The fees for each case are structured as follows:

Application Fee

- One-off fixed fee for use of the Service for each new Case created under a Case Agreement
- The Application Fee will be invoiced following an initial assessment of the case and prior to preparation of PSCAD models.

Recreate Fee

- A fixed fee payable each time a Case is re-created after previously being closed.
- The Recreate Fee will be invoiced following the request for recreation of a case and prior to preparation of PSCAD models.

Engineering Effort

- Hourly rate for engineering effort to create or re-create a case and provide support to users.
- This is invoiced monthly in arrears for each active case.

Environment Charge

- Daily rate comprising virtual machine (VM) and information technology costs for each day the environment is available for a Case.
- Core counts related to the VM running the PSCAD NEM 4-state model, as selected by the customer, with a different daily rate for each core count.
- This is invoiced monthly in arrears for each active case.
