

Summary of Capacity Credits assigned for the Second Reserve Capacity Cycle

(This covers the period 1 October 2008 to 1 October 2009)

The Independent Market Operator has assigned capacity credits to facilities who will provide capacity into the South West Interconnected System during the second reserve capacity cycle. A total of 4,599.875 MW of capacity credits have been assigned to 16 generation and demand side management (DSM) providers as shown in the table below.

In accordance with the Market Rules, the IMO has assigned capacity credits to all certified facilities that are either in service or under construction and which nominated their intention to trade their capacity bilaterally. As a result, the number of credits assigned exceeds the reserve capacity requirement of 4,322 MW by 277.875 MW.

Capacity Credits Assigned for 2008/09

Market Participant	Capacity credits assigned - MW
