RENEWING AEMO'S ENGAGEMENT MODEL-RESPONSE PAPER

GENERAL

The engagement model proposed by AEMO is an excellent first step. It stabilizes an enthusiastic relatively random development of various committees to an integrated whole.

SPECIFIC

EXTENT OF ENGAGEMENT

There are two areas where AEMO needs to encompass within its overall engagement with respect to its ongoing development and present operation as follows:

Potential investors

AEMO is dependent upon an ongoing set of investors interested in contributing as necessary to the stable development of the industry. Identifying and encouraging these is a matter of concern and action.

International linkages

No mention of necessary international linkages has been made. Perhaps this has been left to a future revision.

SILO EFFECT

Some consideration of this effect should be made as the new arrangements materialize.
