1. Context

This template is to assist stakeholders in giving feedback about the options detailed in the issues paper associated with the Standalone Power Systems consultation.

The changes being proposed are because of NER rule changes which have occurred requiring changes to AEMO's Retail Electricity Market Procedures.

2. Questions

Section	Description	Participant Comments
3.3.2	Are there other advantages/disadvantages of any of the options that AEMO should have considered?	No further comments.
3.3.2	Is there another option for identifying a SAPS NMI that AEMO should consider? Why?	No further comments.
3.3.2	Which of the three options for identifying a SAPS NMI do you prefer and why?	Option 2 – TNI Codes with special conversion is Intellihub's preferred option. Based on projected volume to convert SAPS NMI, the rule change is highly manageable via process change as oppose to system change resulting in a cost effective solution.

3. Other Issues Related to Consultation Subject Matter

Participant Comments
Intellihub has requested AEMO to provide further clarifications on the additional requirements for MDP.
