

Tim George Biography

Tim George has been working in the Australasian power industry since 1982 in several senior and executive power systems planning and operations roles. Starting with the SECV and working through a number of organisations including Powerlink Queensland, NEMMCO, AEMO and Transpower in New Zealand. More recently he was Managing Director of DiGSILENT Pacific, a specialist power systems consultancy, and 'retired' in September 2023. He is now taking on projects of interest, where his breadth of experience can best support the energy transition.

Tim's main interests are power system analysis, transmission planning, power system operations and control systems. He has worked extensively on both synchronous machines and inverter-based resources and has a passion for the secure introduction of renewable energy sources.
